How to configure Mega-Debrid on Synology Download Station

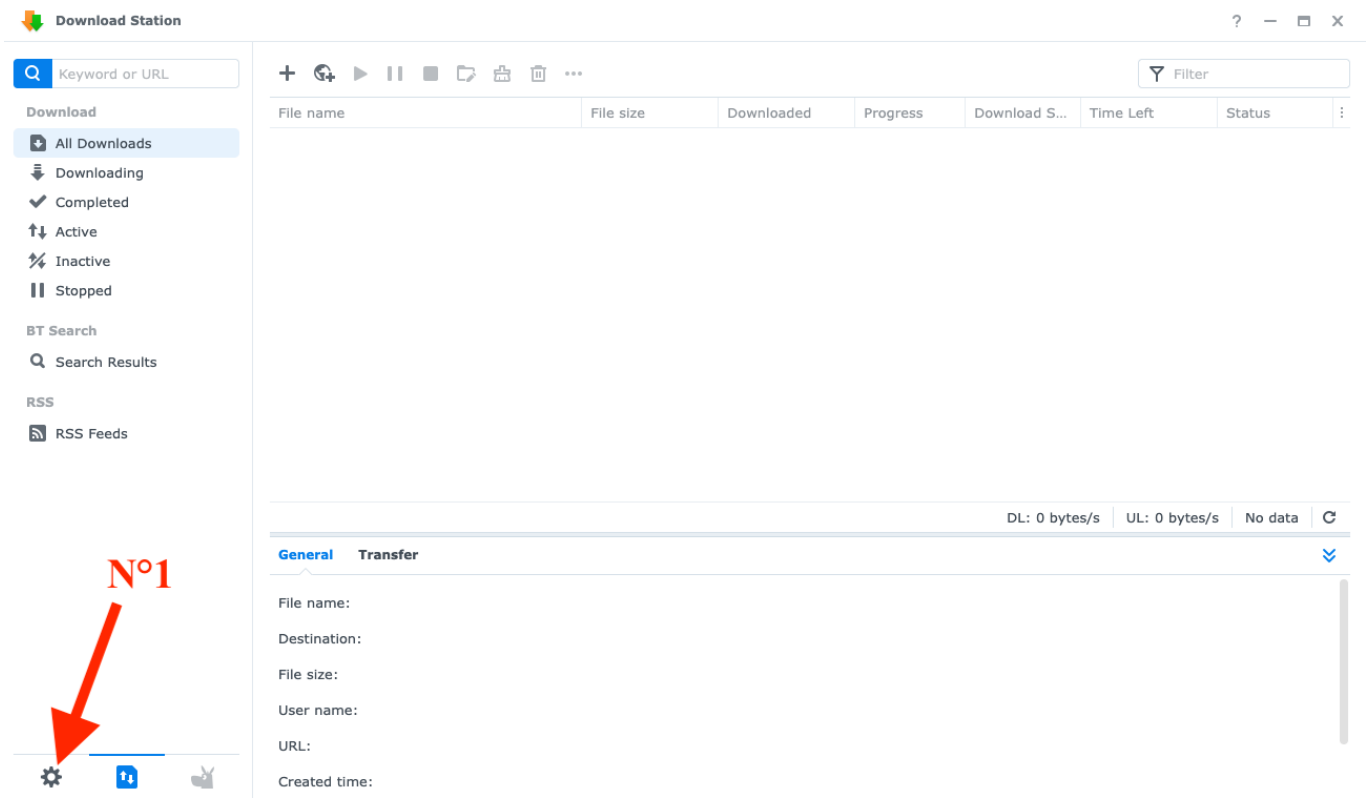

The plugin is available for download by going to the "Software" tab on the website's megadebrid page.

After downloading the plugin, you need to unzip the file to create a file named "megadebrid.host".

All that's left to do is follow the procedure below:

URL: https://help.mega-debrid.eu/index.php?action=faq&cat=1&id=39&artlang=en

Log in with your site credentials and confirm by clicking on the "Ok" button.

Once the connection is complete, all links from supported hosting providers added to Download Station will be automatically unlocked and downloaded.

You can enhance your Download Station experience by combining it with browser plugins that allow you to launch the download in Download Station directly from your browser.
